$%@*-off 2022, let's prepare for 2023!

```
2022 was a horrible year:
* start of full-blown Russian invasion of Ukraine (or, continuation from 2014...)
 ** plus all the other wars going on all over the world...
* 3rd year of COVID-19 global pandemic (this year, all 4 of us got it, too!)
 ** plus few more epidemics... twindemics?!
* Climate Chaos: storms, floods, glaciers melting, droghts, forests burning, blizzards raging...
 ** and that has been a mild year because of the delayed El Nin~o!
* Economic & political crises-es are compounding the natural ones... supply chain issues, higher energy
prices, food shortages, inflation, strikes, corruption, mistreating of migrants, various opressions...

Among all of that, myself & my family were "good enough":
* professionally, I was quite successful as a "face of RIPE NCC"; I gave 25 presentations / talks / workshops;
and I was speaking up for what I believe in: (climate) justice, equity, diversity, inclusion; decentralised &
empowering/participatory processes; slow tech, low tech, retro tech...
 ** here are many videos: https://www.youtube.com/playlist?list=PLJD5uaec7bwyDUPN7VJOHiEzcAYd2x9XS
* "Working From Home" was a mixed blessing: I enjoy the comfort & convenience,
  but I do miss team-cohesion that was smoother when we were in the same office together
* I've joined multiple new communities & projects - let's see which will continue...
* I've traveled a lot, mostly for work; I was away from home for a month  twice! and I had several vacations too!
  it was lovely seeing friends again, after several years (or even 25 years!)
* we've had a Lika-vacation together; and kids took Inter-tail trips & stayed many of my friends! (thanks!)
* both Alisa & Charlie got nice jobs in restaurants: learning about capitalism first hand ;-)
* I've celebrated my 50th birthday twice!
* Arnd had several TechInc parties, plus bought Flipper0 & many 3D printers
* we were lucky that we are alowed & able to stay in our current house!
* we hosted many guests! (latest: Skye&Mateo, Arne&Lasagna, Mileva)
* I got a new  new Mastodon account (thanks, Trammel!): https://social.v.st/@becha
 & a home page (thanks, Arnd!): https://becha.unciv.nl

There are many PDFs with photos about 2022 there!!

In 2023, I have some wishes & plans: let me know if this "resonates" with you!

- InterRail trip -> March or April -> "friends tour" -> I'll come to visit you :)
- events: FOSDEM (February, Brussels), SEE-11 (April, Split); ripe86 (May, Rotterdam);
DeGrowth (August, Zagreb), IETF (November, Prague)
- LikaCamp2023!
- "Connecting Lika" = bringing Internet to GubavcevoPolje!
  https://wiki.techinc.nl/User:Becha/Lika/ProjekatPovezanoPolje
- Expanding my collections of funding / grant oportunities & Jobs offers.

I am dreading that 2023 is going to be worse than 2022 -- so let's work together on "adaptations",
and let's celebrate what we survive together, with friends & in solidarity!

I will continue to advocate for Climate Justice, JEDI & Community Building.
